

Please reject petition 04-160. XM is a pay service offering the highest quality and the most variety available. The idea of the NAB trying to limit XM radios ability to provide up to the minute coverage of local traffic and weather is UNAMERICAN.

The NAB has become monopololized by a few "Mega" broadcasters. The number of independent broadcasters in the United States has steadily declined over the past decade. These "Mega" broadcasters have purchased the majority of radio stations in most markets stifling competition.

I urge you not to pass petition 04-160. Send the message to the NAB that you are NOT for sale and open and free competition improves the quality of the content on our airways.

XM Radio has done what the NAB has never been able to do... build a better mouse trap.
